first of all it's just the Smile promo CD which was faked! It's very easy to distinguish cause the fake has a number(00467317) only in the matrix section near the middle hole!The Original one has two bar codes in the enclosed matrix band followed by "Sony Music" and the first IFPI number(L551)! Than comes the matrix number, S1100467317-0101 followed by two digits(11) and a serial code(A1). A second IFPI number(94**) is printed in the hub section(plastic aera near the middle hole).These typical Sony music signs and letters you can't fake!! In no way!!
