Hi everyone,

I would to know if someone can give me more information about this DISC that I have.

It's a "picture disc" of dangerous.

I am sur is not one of those who are official because there is no music on it, and no hole at the tope of the disc.

It is the same picture used for both side.

What is curious is the quality of the print. It is a really good print quality

Only one number appears at the middle which is 4153.

Is someone have any information :)

Hi,

it should be the promo display without music on it and it's original.

I believe the disc is worth \$1,000+. I have the same disc as well as the one with the Christmas music on it. Keep it safe!

If it's the US display one without music is around 400 USD. The one from Brazil with the music on it, it may be worth around 1200/1500 USD.
