

What kind of CD is this?

Posted by phil74 - 2011/05/19 18:35

I saw in the Internet

A "Michael" CD with 13 Tracks + DVD in Slip Cover.

I am talking about the 2010 relested 10 track album.

Is there a release with Bonustrack and DVD?

Official?

What is the country of origin? Barcode?

Thanks for helping

Thanks,

I know that some countries have special licenses. For example I have a legal Michael CD from Belarus.

But this version is a fake. They claim to be in USA but are from Russia. They even claim to have licenses for many rare CDs but after an intensive search I found no evidence that this double CD version is an official release.

Hello,

you should post a picture of yours and show the inner part of the CD or find the Matrix nr. IFPI number and write it down here. Only this way we can tell you if it's original or not.

if there's not ifpi codes inside the inner ring as you're showing here, I think it's a bootleg. IFPI codes must be present indeed.
