## USA For Africa: We Are The World DVD/CD Set 2006 (Japan)

Both of these DVD/CD (2006 and 2009) sets contain the studio video of the song only , not the rehearsal or live versions of the song. The 2006 release date is 29 Jun 2006. The 2009 release date is 17 Jul 2009. The two obis are virtually identical except for a changed comment on the obi with information about Michael Jackson, after the his death on 25 Jun 2009. The black text down the centre of the obi is the same on each issue - it says that this was a "super session" of top artists, available for the first time as a single CD and DVD package. The text on the right side on the front of the obi is changed - the original 2006 text is that "the world became one and opened its heart to sing together â€" here is that famous, moving and timeless track". On the 2009 release the last part is changed to "and now Michael has become a star (in heaven), but once again you can find his hope here in this track".
