Thriller German Gold Award Presented To Michael Jackson (Germany)

THRILLER German gold award presented to MICHAEL for the sales of 250.000 copies in Germany. This in fact was the first Gold record Michael got from the German phonographic association. The record the award is made of is the original metal stamper they used to press the Thriller records in a press plant. These kind of stamper-awards are pretty common for (continental-) European awards. A unique item as this is the only one in existence that was given to Michael
